

Anatoly Soldatov

ML Engineer

Work Experience

06.2025 - to present	 MTS Web Services	ML Engineer
<ul style="list-style-type: none">Added RAG service functionality via FastAPI, keeping around 1000 processed corporate documents in Qdrant for vector searchConfigured monitoring of 25 metrics for vLLM and RAG service in order to track realibility in stage and production through Prometheus and GrafanaMeasured 4 RAGAS LLM-as-a-Judge metrics for RAG pipeline evaluation and following comparative experiments via Langfuse		
03.2025 - 06.2025	 AIRI	ML Intern
<ul style="list-style-type: none">Achived 7/11 and 5/9 places on personality and performance tracks of AVI Challenge 2025 competitionIterated over more than 100 ablations of modalities and architectures model combinations, tracking training and metrics via MLflow		
01.2025 - 03.2025	 Along	Prompt Engineer
<ul style="list-style-type: none">Set up 3 pipelines with business logic in n8nOptimized prompts of OpenAI analyze image node to business domain taxonomy improving accuracy of class recognition up to 90%Improved quality of OpenAI edit image node for stable isolated object generation with transparent background decreasing token usage almost 2 times		

Articles

2025	 Personality and Performance traits Assessment on Asynchronous Video Interview via Multimodal Fusion
2024	 Enhancing Action Recognition with Advanced Frame Extraction Techniques

Education

2022 - 2026	 Innopolis University	Bachelor
Applied Artificial Intelligence
